

How good is this my son, give us thanks to the Lord for all this food.

My name is Margarita Rojas Suarez and I have two daughters, thanks my daddy God, one has two children and the other one has three children.

And I have this treasure, it is my child, because it is of my own as his mother was only 16 years old and with 2 children so she left him at the hospital and I took care of him.

I have been working, cleaning, washing, ironing to get some fruit for him to better service him and send my two children to school, now they don't go anymore to school.

Now is 16 years since I am after him, being close to him, bringing him carrots, potatoes, beans, levers and meat. He is as a person, very valuable, he is my blood, it is my own, he is my son.

I feel alone, quite alone. I feel like losing strength, my strengths and see his future very black. Who is going to take care of you if something happen to me, if I break my leg, if I cannot carry on, who will help you my son?. Who will hold you his hand? I feel tired I am almost 86, my God don't allow this could ever happen, who could be after you my son?, He will remain without therapy, he will be without care. I would not be able to, I would feel failed, all what I have dream for my child I would not be able to afford it.

If I don't come along I know he will not come along either, so I ask my Lord to move to pity on me, that appear an Angel to take care of him.

When I came here for the first time, blessed God, You have been a marvelous thing to me, somebody more to take care of him to help him.

Sometimes he is quite tense and I cannot undress him and I have to take care of his column to adjust.

All this for me is wonderful. In this place you have given him lot s of strength and courage. All these things give comfort and fill me of joy. It is a great pleasure that you have my child in this place where everybody loves him.

I am not fell tired for my child as I love him a lot and ask God to give me strength and I could have a big heart for my child.

My dream for him it would be that he could study, have friends.
